Value Proposition:

The Ultra High Purity (UHP) 700 Series high flow valve offers high purity and high flow for UHP gas distribution systems. The unique design reduces valve weight and, as a result, lowers installation costs.

All Parker UHP bellows valves use a full flow bore that positions the bellows assembly out of the flow path when the valve is open.

Product Features:

- Inconel 625 bellows for increased pressure, ultra high purity and maximum cycle life in a small envelope
- Lower weight reduces gas distribution system installation costs
- Optimized stroke for higher Cv
- Optimum purge port locations at seals
- Maximum operating pressure 375 psig (250 psig 1" size)
- Sizes up to 6" available
- AOP available in 1", 1-1/2" and 2" sizes
